Informatik-Kolloquium

Rheinisch-Westfälische Technische Hochschule Aachen
Lehrstuhl für Informatik I

EINLADUNG

Zeit: Montag, 13. September 1999, 16.00 Uhr

Ort: Seminarraum Informatik I, Ahornstr.55 (ehem. PH)

Referent: Prof. Dr. Beloslav Riečan,
Slowakische Akademie der Wissenschaften,
Bratislava/Slowakei

Thema: On the multivalued algebras

Abstract:

The notion of an MV algebra has been introduced in the 50th, it has been systematically studied and applied in the 80th and 90th in a connection with mathematical logic and fuzzy sets theory.

We shall mention some elementary examples inspired by fuzzy sets and ordered groups and some applications in quantum structures. A special attention will be given to some probability aspects.

Es laden ein: Die Dozenten der Informatik
