Informatik-Kolloquium

Rheinisch-Westfälische Technische Hochschule Aachen
Lehrstuhl für Informatik V

RWTH

EINLADUNG

Zeit:	Donnerstag, 17. Juni 2004, 16.30 Uhr
Ort:	Hörsaal AH I, Ahornstr. 55
Referent:	Professor Renchu Gan School of Management and Economics, Beijing Institute of Technology
Thema:	A framework of information service platform(ISP) in E-government systems

Abstract Development of E-government has been a country-wide effort in China since the end of last century. More than 80 % of governmental institutions in central and provincial governments have initiated to develop information systems to support their transaction processing, decision making and public services. As an example, a proposed E-government platform for Beijing Municipality is introduced. Information sharing, exchange and services among various users are critical issues in e-government development. An ongoing project on a framework of information service platform(ISP) is illustrated in order to deal with various patterns of both users requirements and business processes. An architecture scheme of ISP with multiple layer is presented. Its adaptive mapping mechanism from user's requirements to business processes and from business processes to technical functions are discussed.

Keywords: E-government; information service platform(ISP); adaptive mapping mechanism; Beijing Municipality
